Glass Strip Cutter

Model: SC

Designed for High-Volume Precision Glass Strip Cutting

The PST Strip Cutting Machine is engineered for fast, accurate production of uniform glass strips for a wide range of fabrication applications. Designed to cut strips as narrow as **1½ inches**, the machine combines precision cutting heads, a rigid aluminum bridge, and a variable-speed powered conveyor to deliver consistent scoring and clean breakouts. Its rugged all-welded steel construction and expandable cutting head design make it an ideal long-term solution for growing production demands.

Why Choose the PST Strip Cutting Machine?

- High production throughput with consistent, repeatable accuracy.
- Quick, easy cutting head adjustments reduce setup time.
- Low maintenance design with long-lasting precision components.
- Expandable configuration protects your investment as production needs increase.

Features and Benefits

- Produces precision glass strips as narrow as **1½"**.
- Variable-speed conveyor with cutting speeds from **10 to 100 ft/min**.
- Precision aluminum bridge ensures accurate imperial or metric head positioning.
- Oil-fed cutting heads provide smooth scoring and extend cutting wheel life.
- Powered conveyor system delivers consistent glass movement beneath the cutting heads.
- Cuts glass from single strength up to **¾"** thick.
- Heavy-duty all MIG-welded steel frame for years of dependable service.
- Additional cutting heads can be added as production requirements grow.
- Operates on standard **115V single-phase** power.

Technical Highlights

- **Power:** 115V Single Phase
- **Cutting Speed:** 10–100 ft/min
- **Minimum Strip Width:** 1½"
- **Available Models:** 60" to 102" glass widths with 3 to 5 cutting heads
- **Machine Weights:** 650–1,500 lbs

GLASS STRIP CUTTER				
MODEL	MAX GLASS WIDTH	HEADS	DIMENSIONS (LxWxH)	WEIGHT (lb)
SC-60-3	60"	3	86 x 82 x 58	1050
SC-72-4	72"	4	98 x 98 x 58	1400
SC-84-4	84"	4	110 x 100 x 58	1650
SC-96-5	96"	5	158 x 122 x 58	2500
