## Universal Free Fall Rack

**Model: UFFR**

### Free Fall Systems and Compatible Equipment

Designed to improve glass handling efficiency and workplace safety, the Universal Free Fall Rack (UFFR) provides a stable platform for staging and transferring glass packs throughout the fabrication process. By reducing manual handling requirements, the UFFR helps increase throughput, lower labor demands, and minimize operator fatigue.

#### Features & Benefits

- Increases glass throughput and productivity
- Improves personnel safety by reducing manual glass handling
- Reduces manpower requirements
- Minimizes operator fatigue
- Heavy-duty design for glass pack storage and handling
- Compatible with PST automated loading systems

#### Compatible Equipment (Sold Separately)

##### FFAL-RL Free Fall Autoloader (Mounted for Rear Loading)

- Available for glass heights from 84" to 102"
- Designed for use with the UFFR
- Rear-mounted free fall loading configuration

##### Free Fall Base

- Equipped with mounting bracket for securing the FFAL
- Provides a stable mounting platform for automated loading operations
